DETAILED ACTION

Allowable Subject Matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a sealing assembly for setting in a tubular comprising at least two pistons disposed each side of a seal, and one of which being movable to compress the seal in response to the wellbore fluid pressure, the other of the piston being movable to compress the seal in response to the fluid pressure supplied to a fluid port on the tubular. The prior art of record including Geisow, Brooks, Yonker et al, Ross et al, White et al, and Pringle while all show tubular annular sealing means having annular piston actuation means, however the piston or pitons of the prior art does not function to compress the sealing element(s) due to wellbore fluid and the fluid pressure introduced through the tubular fluid pressure control line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Geisow, Brooks, Yonker et al, Ross et al, White et al, and Pringle all show tubular annular sealing means having annular piston actuation means.
